

ePortfolio Assignment Instructions

Overview

In this assignment, you will create a professional ePortfolio using Quarto, with Git version control, hosted on GitHub, and published using GitHub Pages. Your ePortfolio will showcase your technical skills, academic achievements, and professional development through various sections, including a landing page, about page, CV, and professional projects that incorporate coding and data visualisation.

This assignment will help you develop valuable skills in web development, version control, and professional online presence.

Assignment Objectives

By completing this assignment, you will:

- Develop a professional online portfolio using Quarto and GitHub Pages.
- Utilise Git and GitHub for version control, tracking changes, and managing code.
- Customise your portfolio using HTML templates, CSS, and Sass for design improvements.
- Integrate Python and SQL code, including data visualisations, in your professional project.
- Apply best practices for multimedia integration, usability, and web design.
- Demonstrate critical thinking and reflection on your learning and career development.

Submission Instructions

1. Ensure your ePortfolio is live on GitHub Pages.
2. Submit the URL of your ePortfolio via the designated submission portal.
3. Include the link to your GitHub repository in your submission.
4. Ensure all pages, files, and media elements function correctly before submission.

Deadline is extended to April 25, 2025.

Assessment & Grading

Your ePortfolio will be assessed using the provided rubric, considering technical implementation, content quality, design, and professionalism. Aim for an Exemplary rating in all criteria.

Resources & Support

For any questions, please consult the module slides/recordings or schedule a support session with me.

Good luck!
